

## ***Practical understanding and application of Risk Assessment PRAS: A half day training course***

### **The Course Introduction:**

**Understand the basic fundamentals of PRAS - Risk Assessment and how to apply in the Product and Production Supply Chain and achieve GOOD Business growth.**

### **The Course Objectives:**

**Secure your business, reduce quality claims, production and supply chain compliance costs. Prepare your business for new international business standards on Risk management in 2015.**

### **The Trainer:**

***Mark Astley of Robert Vernon Associates has over 25 years experience working with global retailers and suppliers including IKEA and Tesco operating across the Far East and Europe. Work with him to explore ways to improve sourcing and production performance, minimising risk in the fast developing world-supply market.***

### **Who should attend?**

**Managers, Supervisors and Senior operators in Production and Supply Chain Management.**

### **The Course Content:**

- **Understanding hazard and risk**
- **The elements of Risk**
- **Determining what is the Risk**
- **Application of the Risk Result – where, what and how**
- **Moving forward with PRAS into the supply chain**

**This half day is highly activity-based so you learn in a fun, informative and interesting way. It is part of a Good Business Growth approach and training package for Quality, Social and Environmental management. *Move from awareness to implementation: supply quality products on time, at a competitive price, made and supplied by profitable organisations that care – GOOD Business Growth.***

**Course programme:**

- **First part: The theory of PRAS Risk Assessment**
- **Second part: The calculation of PRAS**
- **Third part: The application of the PRAS results**
